EDUCATION

MAHARAJA AGRASEN INSTITUTE OF TECHNOLOGY, NEW DELHI **August 2024 - Present**

Bachelor of Technology(B.tech) - IT **CGPA:9.2**

SKILLS & ABILITIES

Language: Python, C, C++, HTML, CSS, JavaScript

Concepts: Data Structure and Algorithms, OOPS, REST API Fundamentals, MVC Architecture

Frontend Development: React.js, Tailwind CSS, Responsive Web Design

Backend Development: Node.js, Express.js, REST API Development

Database: MongoDB, JSON

Tools & Platforms: Git & GitHub, Postman, Visual Studio Code

Soft Skill: People Management, Excellent Communication, Problem Solving, Conflict Resolution

PROJECTS

Workforce Management System (Full-Stack SaaS Platform)

- Developed a web platform to manage construction workers, track site-based attendance, and automate wage calculation.
- Implemented **role-based access control** for Admin, Contractor, and Supervisor.
- Built **REST APIs** for worker management, attendance tracking, and invoice generation.
- **Tech Stack:** React.js, Node.js, Express.js, MongoDB, Tailwind CSS.

CRM Builder (Customer Relationship Management Platform)

- Built a customizable CRM system to manage clients, leads, and business workflows.
- Developed backend APIs for handling customer data and activity tracking.
- Designed a modular UI for managing and organizing client information.
- **Tech Stack:** React.js, Node.js, Express.js, MongoDB.

AI Powered Reel Generator

- Developed a complete **Generative AI pipeline** that converts product stories into social media

reels.

- Engineered the **Gemini API** script to produce a structured **JSON video script** from a narrative input.
- Utilized **MoviePy** to automate video production, synchronizing text-to-speech voiceovers with images and dynamic captions for a final MP4 marketing asset.

SmartSafe Tour

- **Technologies: Python (Flask)**, **HTML5**, **CSS3**, **Responsive Design**.
- Developed a **Flask**-powered, full-stack travel planner, demonstrating proficiency in application architecture and complex routing.
- Engineered a high-fidelity, mobile-first UI using custom **HTML** and advanced **CSS** (Flexbox/Grid), ensuring complete cross-device responsiveness.
- Designed an innovative **Emergency & Re-planning Module** prototype to manage travel risks, highlighting creative problem-solving and feature development.
